Mining Indonesia 2026 is the region's leading international platform where industry leaders, innovators, and decision-makers converge to showcase the latest in mining technology, sustainable practices, and integrated industry solutions. As the largest mining exhibition in Southeast Asia, it remains the most anticipated gathering for the mining sector in the region.

Through Innovation:

Advancing Indonesia's Mining Future

Indonesia's mining sector is entering a transformative era. With some of the world's largest reserves of critical minerals, the nation is not only expanding extraction but also accelerating downstream initiatives that strengthen its position in the global supply chain. In today's mining landscape, extraction alone is no longer sufficient, success depends on maximizing recovery, improving efficiency, and minimizing waste. From reprocessing tailings and slag to deploying advanced smelting and refining technologies, mineral recovery is becoming the key to unlocking hidden value while reducing environmental impact.

The government has accelerated 18 mining-related development projects valued at USD 38.6 billion for potential funding. These projects span mineral and coal processing, energy security, and energy transition-related infrastructure.

Shaping a Sustainable Mining Future

As the world accelerates towards a low-carbon future, the demand for critical minerals has never been more urgent. Mining Indonesia 2026 will highlight:

Sustainable mining practices that balance growth with environmental responsibility.

Technological innovation in mineral recovery and efficiency.

Collaborative strategies to reduce environmental impact while supporting economic progress.

Mining Indonesia 2026 will serve as your gateway to this transformation, unlocking opportunities and exploring strategies for sustainable growth. By showcasing Indonesia's strengths and addressing the industry's challenges, this event will bring together the global mining community to exchange knowledge, build partnerships, and shape the future of an industry vital to both the economy and the global transition to clean energy, setting the course for a more sustainable and resilient mining sector.

INDONESIA MINE IN NUMBERS

Nickel Production:
Over 1.6 million tons annually, nearly half of global output.

Copper & Gold:
The Grasberg mine remains one of the world's largest, producing 1.5 billion lbs of copper and 1.7 million oz of gold in 2023.

Tin:
Indonesia is the world's second-largest tin producer, supplying 32% of global exports.

Investment:
Mining accounted for 23% of total national investment in early 2025, driven by smelter development and downstream projects.
