ConnecTechAsia Regional Tech Talk Roadshow Indonesia

Hall B3-5717, Jakarta International Expo, Kemayoran
Digital Innovation in the Manufacturing Sector

The emergence of key technologies such as cloud computing and the Internet of Things is transforming the manufacturing sector. Operational technology is converging with information technology, leading to innovation. This tech talk will discuss the ways new technology is transforming business with a focus on manufacturing. It will also highlight some of the challenges associated with digital transformation in manufacturing.

Exhibitor Testimonial

“ JETRO Jakarta is committed to continuing to support Indonesia towards Industry 4.0 by introducing the latest Japanese products and technology. Technology is growing rapidly, which means that besides having professional human resources, and being able to use technology 4.0, Indonesia also needs technology-based companies to further improve the quality of their products. Manufacturing Indonesia 2019 Series is a golden opportunity for us to introduce our products and technology comprehensively to Indonesian companies.

Keishi Suzuki
Presiden Director
Japan External Trade Organization (JETRO) Jakarta

“ We joined Manufacturing Indonesia for the first time three years ago. We offer cutting tools, bearings, hydraulic equipment, and machine tools, but have over the past few years started to develop automation solutions, that is to say robots for all kinds of purposes. We are able to support a wide range of industrial machinery, from foods, over automotive, to electronics, and infrastructure. The show allowed us to demonstrate our latest product: the CZ10 for customers who wish to explore computer-programmable robots.

Katsuyoshi Enoki
Vice President Director
PT Nachi Indonesia

“ We have been a regular at Manufacturing Indonesia for years. The show provides us with an opportunity to show our latest innovations in sheet metal technology, machine tools, and laser technology - this helps us gain more brand recognition, and thus grow our market share. However, our main focus is hearing what challenges our customers face and how we can provide solutions as well as learning how we can improve our services.”

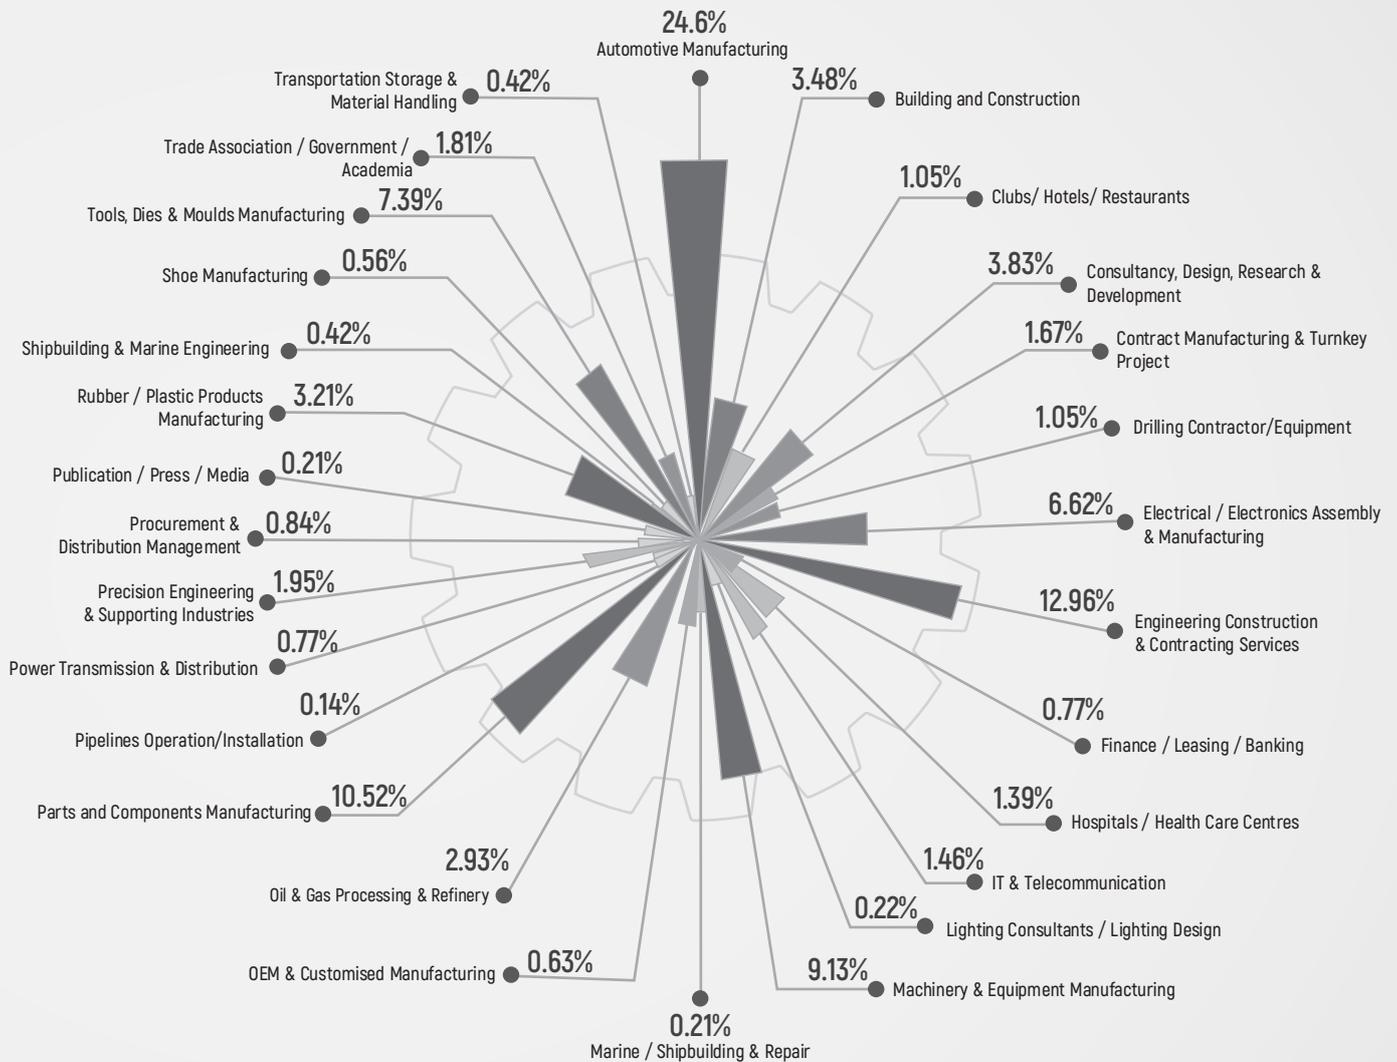

Stephen Sidharta
General Manager, Trumpf Indonesia

Visitor Overview

Manufacturing Indonesia 2019 Series of Exhibitions provides the most cost effective way to increase your business in South East Asia's biggest manufacturing market.

The perfect opportunity to demonstrate your products first hand to your clients and future business partners. Over than 35,000 trade attendees have visited the 2019 edition, nothing beats seeing the products live – seeing is believing!

88.93%  Find new suppliers

91.78%  Source new products

92.69%  collect market information

96.14%  Quality of exhibitors

Visitor Testimonials

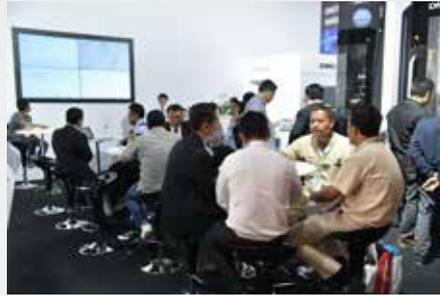

“ I would definitely like to visit Manufacturing Indonesia again next year as it is a valuable channel of international repute that has most of the cutting-edge machines and manufacturers.

Prasad Phadnis
Regional Sales Manager Asia Pacific, VARGUS Ltd

“ Our company works in the field of paint and plastic injection and we were looking for some spare parts. These spare parts are difficult to come by in the market; we had to wait six months to receive the last spare part we ordered, but here we already met a new supplier. My impression of this event is very good and that it covers a wide spectrum of the industry. There are a couple of items we couldn't find in the market, but we already found several of them here.

Nur Amin
PT Takagi Sari Multi Utama (Cikarang- Indonesia)
